our love of the fuel-burning car with its poisonous exhaust
1..... has had a devastating effect both on our
environment and on oil supplies. It is unlikely we will abandon
our cars in large enough numbers to resolve this problem, so
there is a pressing need to find an 2..... fuel. Many
car companies are exploring 3..... energy sources.
Hybrid cars were first developed in 1997 and these are likely to
become more commonplace in the future. These vehicles that
use 4..... panels to extract hydrogen from water are
also likely to be readily available in the future. These vehicles
5..... only water vapour and so do not contribute to
6..... . However, critics say that building a
network of fuelling stations and 7..... existing petrol
stations to hydrogen will prove too costly and
